Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response the 2/24/03 amendments and remarks, the search was updated. It was discovered the application 09/296,602 upon which provisional obviousness type double patenting rejection were made in papers 2 and 7 has issued. Below a new obviousness type of double patenting rejection is made over the issued patent.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,420,181. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to TLC method where the analyte is immobilized at the point of application to the TLC plate.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 13-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tyihak et al.

See the appropriate paragraph of paper 2.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 17-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tyihak et al.

See the appropriate paragraph of paper 2.

Allowable Subject Matter

If Applicants were to overcome the above obviousness type of double patenting rejection and cancel system claims 13-17, the art of record would be overcome with respect to method claims 1-11.

Response to Arguments

Applicant's 2/24/03 remarks were not convincing.

Applicant's state the Tyihak fails to teach the analyte present at the point of application. Claims 13-27 are "system claims" that require the sample to "remain at the spot of contact". The claims do not encompass any further method steps that may be performed to the "system claims" and only require the sample to remain at the spot of contact. The Office maintains when the sample

is added to the device of Tyihak these conditions are met and the subsequent method of intended use is of no patentable moment.

Applicants state the instant invention does not relay on the typical elution/diffusion of the prior art TLC method. The Office agrees and has indicated the method claims as containing allowable subject matter. However, the system claims are directed to convention TLC apparatus and do not define over the art.
